Notes:

1. Service delivery times are estimates based on receipt of complete and auditable organic system plan, with clear and robust supporting documentation and records as applicable to your operation. These estimates do not account for additional requests for information due to incomplete or unclear submissions, or time needed for applicants to respond to such requests.
2. Labels must be of same general layout, design and brand for bulk rate to apply.
3. Additional inspections may be required to process scope expansions (new land, facilities, processes, etc.) or may result from the necessity for increased surveillance of certified operations or for investigative purposes. Additional inspections may be announced or unannounced.
