

Non-GMO Project Verification

Earn Recognition Under the Most Trusted Non-GMO Label

The Non-GMO Project Verified seal, featuring the distinctive Monarch Butterfly, is one of the most recognized labels in North America, accounting for over 30% of food and beverage retail sales in the US.

Verification demonstrates your commitment to ingredient transparency, consumer trust, and responsible sourcing. It also helps brands proactively meet the National Bioengineered Disclosure Law by verifying non-GMO claims through a trusted, independent third party. Non-GMO Project verification applies to a wide range of products and brands in the health and beauty, cleaning, textiles, and animal products sectors.

Why Choose SCS?

Unmatched Experience & Customer Service

- **40+ years** of expertise in food auditing, testing, and certification
- **Over 90%** customer satisfaction
- **Dedicated 1:1** customer support tailored to your unique needs

Fast-Track Your Certification

- Within weeks for eligible companies of all sizes
- Virtual/remote audit capabilities to accelerate timelines

Maximum Value Through Bundling

Save 10% when you bundle two or more certifications. Combine Non-GMO Project, USDA Organic, SCS Gluten-Free and/or SCS Plant-Based to save 10% on each program's Assessment Fees in the first year of your certification. Bundled audits with SCS include trained auditors and support staff who can assess your products to multiple standards simultaneously.

Ask us about bundling your Non-GMO Project Verification with other food safety and sustainability certifications for maximum cost savings and operational efficiencies.

The Verification Process
