SERVICES
Setting the standard for sustainability

On the Cover:

Kingfisher birds are beloved around the world, with more than 90 species in a variety of habitats. Easily recognized by their large heads and long beaks, Kingfishers are admired for their colorful plumage, keen vision, and skillful hunting. They are indicators of environmental health.

Independent certification by SCS, as represented by the SCS Kingfisher, is a visual expression of our proven commitment to sustainability through environmental stewardship, responsible resource management, and protection of workers and communities.

IN SERVICE OF SUSTAINABILITY

The business world has embraced Environment, Social and Governance (ESG) practices as a framework for conducting more ethical and transparent business while reinforcing the bottom line. SCS Global Services has been a pioneer in this space, working for four decades to advance sustainability, in order to ensure a healthy planet and a thriving economy that works for everyone. In service of this mission, we are proud to work with clients around the world in the natural resources, built environment, consumer products, food and agriculture, retail, and climate sectors.

We work with companies large and small, associations, government and intergovernmental bodies, non-governmental organizations, and community stakeholders. Our services include auditing and inspection, verification and certification, training, and consulting – all grounded in solid business values and sound science. Through these services, we enable decision-makers and purchasers to make informed decisions, giving innovators a competitive edge, and helping propel the growth of a sustainable economy through the development of leadership standards and solutions that drive continuous improvement.

Having a Positive Impact

Together with our clients and partners, we are actively impacting the world around us in many ways:

- Advancing sustainable agriculture
- Assuring corporate sustainability reporting
- Assuring food safety and quality from farm to fork
- Building resilient communities
- Encouraging resource conservation and recycling
- Enhancing sustainable manufacturing and business practices
- Incentivizing responsible materials extraction and processing
- Promoting indoor air quality for building products, furnishings, and finishes
- Protecting fragile ecosystems on land and at sea
- Reducing company carbon footprints
- Reinforcing fair, safe, and healthy work environments
- Safeguarding precious fresh water supplies
- Securing supply chain integrity
- Supporting informed decision-making

Our Role as a Neutral Third Party

As a neutral third party, we have the informed, independent perspective needed to conduct credible certification audits and provide effective solutions, helping clients identify improvement opportunities and build customer and stakeholder confidence. Our third-party status is corroborated through national and international accreditations, and is built upon the following foundations:

- We are fully independent, with no financial backing from any institution or organization with an interest in our clients or their products.
- We operate on a fee-for-service basis, providing transparency and ensuring that our fees are not attached to client success or sales volumes.
- We engage independent labs when product testing is required, enabling split samples and anonymity for quality control, while assuring customers that we have no interest in excessive testing.
- Our Quality System policies insulate our findings from commercial, financial, and other pressures as SCS managers document and analyze potential conflicts of interest for each project.

SCS HIGHLIGHTS

1984-PRESENT

1984

Established world's first Pesticide Residue Free certification program for fresh produce, with first voluntary full disclosures from growers.

1985

Established first pesticide residue and nutrition testing QA program for supermarket fresh produce departments.

1987

Launched first U.S. HACCP food safety training and audit programs for food producers, processors, handlers, and retailers.

1989

Launched first third-party U.S. certification program for environmental claims, starting with Recycled Content certification, and initiated green labeling and anti-greenwashing services for retailers.

1990s

Participated in writing the international ISO 14000 standards for environmental labeling and life cycle assessment.

1991

Conducted first international independent certification of products made with wood from a responsibly managed forest.

1994

Established world's first Life Cycle Assessment based on ISO Type III Environmental Product Declaration labeling: (Environmental Report Card).

Participated in establishment of the international Forest Stewardship Council® standard and accredited as one of the first certifiers.

1997

Participated in establishment of the international Marine Stewardship Council® standard and accredited as one of the first certifiers.

1999

Established SCS Mexico subsidiary as the first of many international ventures to expand service offerings in countries around the world.

2000

Accredited as one of the first organic certifiers under USDA National Organic Program.

2002

Launched flavor and nutrition management services to help growers, seed companies, and food retailers optimize these features.

2003

C.A.F.E. Practices

Worked with Starbucks to establish C.A.F.E. Practices program for its international coffee supply chain.

2004

Launched sustainable agriculture certification, first for cut flowers and ornamental plants, then for fresh produce.

2008

Launched greenhouse gas (GHG) inventory, including corporate and product carbon footprinting, and carbon offset validation and verification services.

2011

Fair Trade USA™

Supported development of Fair Trade USA standard and became the first accredited certifier.

2012

Adopted new dba SCS Global Services, represented by the SCS Kingfisher Certification Logo, to better communicate our services around the world.

2014

Accredited as auditor to the Responsible Jewellery Council® Code of Practices and Chain of Custody standards.

2014

First certification body fully accredited by the Roundtable on Sustainable Biomaterials.

Approved to conduct UTZ Code of Conduct and Chain of Custody audits for coffee, cocoa, and tea.

Supported development of EFI standard and became the first accredited certifier.

2015

Expanded Sustainably Grown® program internationally with certification of bananas and pineapples.

Accredited by ANSI as an Eligible EPD Program Operator and Independent EPD Verifier.

Published most comprehensive LCA study ever conducted for paper products.

2016

Approved certifier for Primus GFS GAP, GMP, FMS, HACCP scopes.

Approved certifier for ILFI Living Product Challenge and Declare.™

Approved as Non-GMO Project Verification Standard Technical Administrator.

Accredited certifier under the Responsible Minerals Assurance Process.

2017

Named first North American certifier under the RSPO Palm Oil Standard.

Sustainability Leadership Award Winner: Business Intelligence Group.

Recognized by EPA as a Third-Party Certifier for Formaldehyde Rule.

2018

Initiated Gluten-Free Certification Organization services.

2019

Accredited to certify SFI fiber sources and chain of custody.

Accredited to assess composite wood products under EPA TSCA Title VI.

Approved certifier for IRMA Responsible Mining Standard.

2020

Developed on-site and remote virtual audit protocols to meet client needs during the COVID pandemic.

Approved by CARB as verifier for the Low Carbon Fuel Standard.

Sedex-approved for SMETA social compliance audits.

2021

Approved global provider of LBMA and LPPM Responsible Sourcing certifications for precious metals.

2021

Approved to certify Rainforest Alliance 2020 Sustainable Agriculture Standard.

Introduced Certification Standard for Sustainability Rated Diamonds.

Awarded Environmental Finance's Best Verification Company.

Introduced Certification Standard for Zero Waste Facilities.

SCS' Carbon Neutral Certification accepted into Amazon's Climate Pledge friendly program.

Introduced Certification Standard for Gluten-Free Products.

SCS approved to perform validation and verification under Verra's Plastic Waste Reduction Program.

2022

Certification Standard for Carbon Neutral Entities, Buildings, Products, and Services launched.

SCS partners with The Water Council to launch WAVE Water Stewardship Verification with SCS as the sole program verifier.

2022

Introduced REPLENISH™ Verification for Water Stewardship Actions.

Authorized to certify Regenerative Organic Certification Standard.

Accredited to offer American Tree Farm System Standard (ATFS) certification.

Bee Better Certified® authorizes SCS as certifier.

SCS Plant-based Certification program launched to help distinguish plant-based brands and support transparency in product labeling.

SCS expands its Zero Waste standard to include projects and events in addition to facilities.

Regenerative Organic certification program approves SCS as an accredited certification body.

Accredited to offer ATFS certification to private landowners and family-owned forests.

2023

SCS becomes an authorized certification body under the ProTerra certification program.

SCS launches new Recycled Content certification for the electrical and electronic equipment industries. Products certified are eligible for Amazon's Climate Pledge Friendly program.

2024

Sustainable Food Group approves SCS as an authorized certification body for its Sustainability Standard.

Approved as first certification body for Aquaculture Stewardship Council's pioneering new Feed Standard.

SCS launches Global Heat Reduction Initiative (GHRI), a groundbreaking new climate accounting method prioritizing the mitigation activities most likely to reduce global warming in the near term.

Approved as the first certification body for U.S. Farmed™ Certification, which differentiates products made with ingredients grown in the United States.

Approved as an auditor for California Proposition 12 Farm Animal Confinement Initiative.

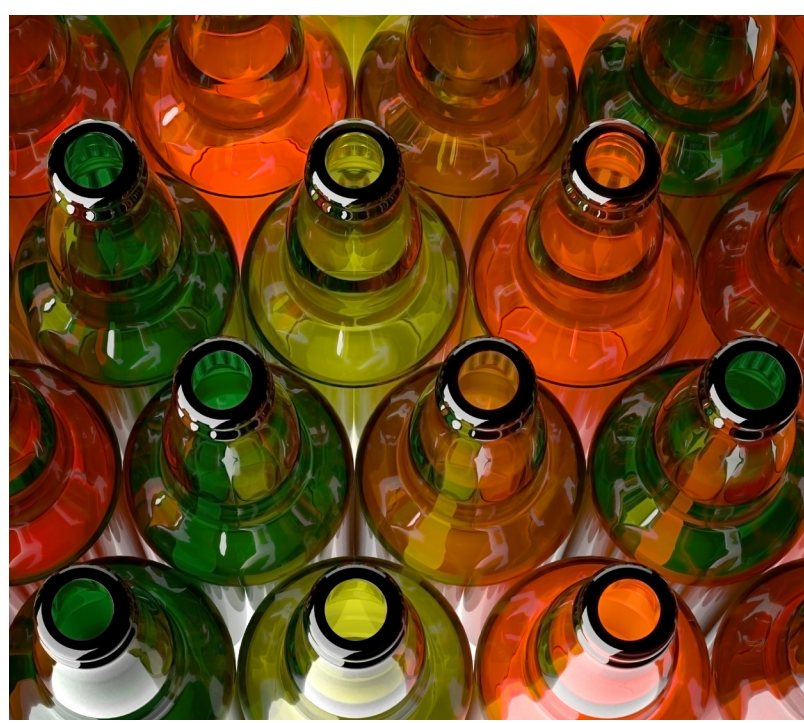

Global Steel Climate Council approves SCS as one of its first verifiers for its Steel Climate Standard.

2025

2BS Association approves SCS as a certification body.

SCS launches Carbon Assured™ Certification program for carbon intensity and reduction calculation for chemicals and co-products.

Del Monte's bananas and pineapples are certified carbon neutral from farm to port.

"Now more than ever, we need to understand the responsibility we have as corporate citizens. The work we employ around our conservation efforts is not one that we take lightly. If we want to 'Build A Better World Tomorrow' we must continuously improve upon our sustainability initiatives and commit to protecting our planet."

Hans Sauter
Chief Sustainability Officer, Fresh Del Monte Produce Inc.

New Belgium Brewing's iconic Fat Tire Amber Ale is America's first nationally distributed carbon neutral beer. SCS issued the certification under the internationally recognized PAS 2060 Carbon Neutrality standard.

Carbon neutral certification for Fat Tire is another step forward in New Belgium's larger corporate sustainability goal to become fully carbon neutral by 2030 across its entire operation, and points to the types of innovations and changes the company has been undertaking. For example, to minimize its carbon footprint, New Belgium has made a deep commitment to renewable energy, powering the brewery with wind power and producing electricity with solar and biogas technology. It also developed the first carbon footprint study for beer, and has donated millions of dollars to climate and environmental causes.

"The standards and the verification process were both very rigorous but also very transparent. Going forward, Fat Tire gets to continue to be a pioneer, in terms of where we at New Belgium believe industry and business, and the country and the world need to go, and this certification with SCS for carbon neutrality is a really big part of that."

Steve Fechheimer
CEO, New Belgium Brewing

One of the world's leading suppliers of olive oil, Pompeian is a farmer-owned collective of more than 75,000 farmers in Spain and California and is partnered with thousands more farmers around the world. Pompeian recognized that to maintain its leadership in the market and distinguish its brand, it would need to work hand in hand with the families who have tended the land for centuries and embark on a mission to bring traditional olive oil production into the 21st century.

At the same time, Pompeian set out to elevate the olive oil industry to achieve new standards of accountability, transparency, and sustainability that avoid any hint of greenwashing. Pompeian selected SCS Global Services and its Certified Sustainably Grown program to help revitalize Pompeian's growing culture and farm-level sustainability practices.

"When we tell other olive growers that we are certified with Sustainably Grown, they are always so impressed because the standard is so rigorous. It's prestigious. So each time one of our farms achieves this certification we consider it to be the best way for us to demonstrate our excellence and commitment."

Paula Lopes

“The team at SCS has been nothing short of professional and reliable. During the height of the pandemic in 2020, one of our strategic grower-partners was able to successfully achieve Sustainably Grown certification by SCS Global Services, becoming the first strawberry operation in the world to hold this certificate. This could not have been done without the guidance, support and clear communication from the entire SCS team.”

Eric Valenzuela

“We were thrilled to be able to work with SCS Global Services to conduct a complete life cycle assessment for AERA. SCS analyzed all areas of our business from production to transportation to storage and delivery and scientifically measured our impacts on the environment. Subsequently, SCS helped us to identify meaningful solutions to offset the key impacts. Our company has a “110% sustainable” mission, which is the core of our commitment to make a net positive impact on the environment. Through this process we are acting to not only neutralize our impact on the planet but to help it heal. We are pleased to say that we are certified carbon negative and have achieved a negative impact on fresh water usage. These achievements, as well as being fully transparent to our customers, would not have been possible without the support of SCS.”

“We are thrilled to congratulate the longfin squid fishery for becoming the first squid fishery in the world to attain MSC certification. This achievement is an acknowledgement and testimony to the great work that the fishers are doing to ensure that they fish responsibly, and will have the resource available for generations to come.”

Brian Perkins
Regional Director for the Americas, Marine Stewardship Council®

“We are excited to build additional trust with our customers through MSC’s certification of our longfin squid fishery. This certification demonstrates that our domestic fisheries management system is working to sustainably manage our major squid fishery to the benefit of the resource, fishing communities, and calamari lovers everywhere.”

Wayne Reichle
President, Lund’s Fisheries

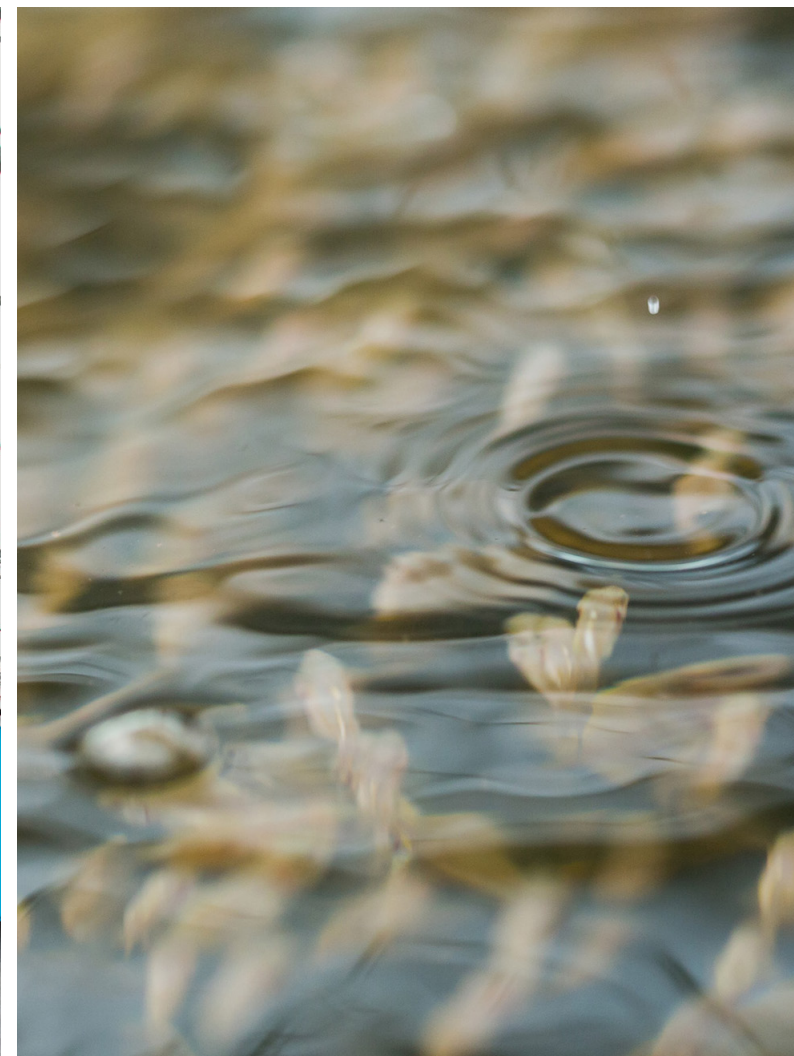

Blue Ocean Mariculture has become the first ASC certified finfish farm in the US achieving certification against the ASC Seriola and Cobia Standard at its Hawaii farm.

Blue Ocean Mariculture farms *Seriola rivoliana*, also known as albacore jack, that is branded as Hawaiian Kanpachi. The farm achieved certification after a rigorous multi-day on-site audit assessing the farm's performance against dozens of stringent requirements covering environmental and social impacts.

Hawaiian Kanpachi is highly prized by chefs, especially for use in sushi. It is found naturally in the waters of the Pacific Ocean, and Blue Ocean Mariculture farms the fish in submersible open-ocean pens in the seas off the island of Hawaii, near Kona.

"Many thanks to Joseph, Renato and the team at SCS Global Services for being respectful and patient with us as we went through our audit. It is a stressful process, and at times you can feel vulnerable when others point out your deficiencies. You did so with empathy and humility. You are welcome here anytime!"

Dick Jones
CEO, Blue Ocean Mariculture

“We have been FSC certified by SCS since 2014. Our policy to source FSC-certified materials and to use our own waste products in paper production not only meets our sustainability values, but helps our bottom line. Through use of these sources, we are demonstrating our commitment to serving our customers for the long haul.”

Marcos UribeIarrea
Paper Business Director, Ledesma

mey

Mey is the first company in Germany to put FSC®-certified clothing onto the market and is also one of the first certificate holders for FSC®-certified clothing worldwide. This distinction enables consumers to consciously select products from companies that act responsibly when it comes to forest resources. The interest in the entire story of products that we use in our daily lives is growing more and more. It is important for many consumers that they do not cause damage to nature or human beings, but instead make a contribution to social and environmental responsibility.

As of the autumn/winter collection 2021, all Mey products containing FSC®-certified materials will be identifiable through labelling on the hang tag or packaging. It will be clear that these products contain wood-based materials such as Tencel™, modal fibres, micro modal or viscose, and have successfully undergone an independent examination by SCS.

“For us, sustainability is a tradition rather than a trend. That’s why we have been focusing on transparent and regional value creation since 1928. By using FSC®-certified raw materials, we try on the one hand to strengthen our sustainable value chain and on the other to highlight to our customers that we use the sustainable raw material of wood for our products.”

Florian Mey
Managing Partner, Mey Unternehmensgruppe

TRAINING AND EDUCATION

We provide a wide range of training courses and webinars, delivered by experienced industry professionals, to assist you and your team in developing, implementing, and improving your operations.

Wide Range of Webinars

SCS hosts free webinars on subjects related to our wide range of service offerings. These webinars provide in-depth explanations of complex material, translate technical information into user-friendly guidance, review market-related issues, and provide how-to instructions. Our library of webinars can be found on our Resource Center at: scsglobalservices.com/resources/all.

Webinar Topic Examples

- Measure and Manage Supply Chain Risks with Easy-to-Use Tools
- Building Products for Healthy Interiors
- LEED V4. EPD Update for Product Manufacturers
- Implementing FSC® Controlled Wood Risk Assessment
- Advances in Life Cycle Assessment
- Tackling Climate Change Based on the Latest Climate Science
- Remote Audits for Chain of Custody: What to Expect
- Water Stewardship Streamlined
- Food Safety and Quality for Hemp and Cannabis
- Food Safety and Sustainable Agriculture – Soil Health, Water Quality, IPM, and Food Safety
- Food Safety Culture Capacity Building – The Value of GFSI Benchmarked Certification in Food Safety

Flexible Auditing Solutions

In our changing world, resilience is essential for success. The coronavirus pandemic served as a stark reminder that companies and organizations must be prepared to innovate and adapt rapidly to changing circumstances.

As a third-party certification provider, our job is to be there for our clients, providing flexible onsite and remote auditing solutions tailored to each organization's unique needs. Combining decades of auditing expertise with advanced tools and technologies, we're helping our clients deliver on their promises and keep their operations strong with flexible auditing solutions.

Food Safety Focus

Our food safety team has been providing specialized training courses for more than a decade. These courses address a broad range of topics, including the requirements of internationally recognized food safety audit and certification schemes, as well as government mandated food safety measures. We specialize in methods to reduce food safety risks and teach you how to prepare for audits.

We offer a variety of training styles including instructor-led virtual or onsite and self-paced online courses. All courses are led by experienced, qualified professionals, and provide curriculum based on the most current food industry standards. Courses include training materials, exams if applicable, and certificates of completion. Our clients choose a training platform that fits best. For a full listing of current food safety training courses, visit: scsglobalservices.com/training.

SCS CONSULTING SERVICES

Our consulting arm, SCS Consulting Services, helps implement transformative sustainability solutions that drive meaningful change within your company and beyond. Our experts have decades of experience in sustainability and an unwavering commitment to scientific rigor, credibility, and transparency. From establishing robust metrics through environmental impact analyses and carbon footprints, to setting ambitious goals and sustainability strategy, and reporting progress to stakeholders and investors, our consultants will serve as your thought partners to deliver innovative tools and solutions customized to your business needs.

SCS STANDARDS

SCS Standards and Assurance Systems is SCS Global Services’ official standard development body, committed to the development of leadership standards that drive sustainability practices and continuous improvement in a practical, responsible, and scientifically-rigorous manner. To this end, we work in three ways:

- 1. We initiate the development of standards for industry sectors and claims categories that are underserved, and that offer important advances in one or more aspects of sustainability. We also partner with industry associations and companies who choose to develop their own in-house standards and specifications to establish industry norms, for quality control, and to facilitate supply chain management.
- 2. We manage SCS-owned standards as well as proprietary standards on behalf of scheme owners.
- 3. We develop assurance systems to support the credibility and consistent application of certification standards and proprietary verification programs. We work closely with clients to understand their needs, theory of change, and goals to design tailored, effective assurance systems.

**GLOBAL
HEAT
REDUCTION™**
SCS GLOBAL SERVICES

GLOBAL HEAT REDUCTION INITIATIVE

Launching in 2024, SCS' Global Heat Reduction initiative measures all drivers of global warming, enabling businesses, governments, and investors to meet net-zero goals while supporting mitigation projects that drive down excess atmospheric heat within years, not decades.

Our groundbreaking new model incorporates all drivers of atmospheric heat, and calculates the heat reduction value of these drivers over any time frame:

- CO₂ and other greenhouse gases
- Short-lived climate pollutants (SLCPs), including black carbon and tropospheric ozone
- Surface conditions such as the Earth's reflectivity (albedo)
- Pollutants that mask global warming but cause air pollution

This comprehensive approach enables:

- Businesses to make carbon credit and footprint reduction investment choices based on their impact on near-term atmospheric heat as well as their longer-term impacts
- Mitigation project owners to communicate and be recognized for the full value for their projects and credits
- More focused action toward the reduction of atmospheric heat in the near-term to build a bridge to net zero by 2050

Global Heat Reduction standards are backed by the latest climate science in the UN Intergovernmental Panel on Climate Change's Fifth and Sixth (AR5 and AR6) Assessment Reports, and peer reviewed by the Scientific Advisory Panel of the UNEP-convened Climate and Clean Air Coalition and top climate experts.

WHAT WE DO

Registry

Providing a next-generation climate registry to fund critical, but currently undervalued heat reduction projects, and enabling organizations to offset their carbon footprints while reducing near-term atmospheric heat.

Footprinting

Offering a new standard to verify the annual climate footprint of organizations, evaluating and driving progress on all heat reduction opportunities.

Advisory

Working with companies, governments, investors, and NGOs to share the best science and practices, implement smarter mitigation strategies and write the next chapter in effective climate action.

RECOGNITION

Over the years, SCS has earned a strong reputation in the industries it serves, standing out for its in-depth expertise, professionalism, and responsive customer service.

“We’ve spent the last two decades doing many different projects with and being a very loyal client to SCS, from certification and verification services to the creation of new pioneering programs that drive global sustainability. These have included Non-GMO Project Verification, Fair Trade certification, and a program we created with SCS called Verified Fair Labor™. Over the years SCS has provided global supply chain audits and product testing as well. We’ve had excellent service from SCS and the SCS culture from a client perspective has just been incredible.”

Brian Durkee, CEO
Numi Organic Teas

“We are deeply committed to the food safety values of the GFSI standard and aim to foster the principles of the Sustainably Grown audit in our harvesting, cooling and growing practices. SCS has been a fantastic resource and group to work with. Their customer service has made the process of certification all that much better.”

Kristina Nunes
Director of Food Safety, The Nunes Company, Inc.

“With EFI being new, I was pleased with how SCS Global worked with us to make it a clear, cooperative process. We were able to effectively navigate the requirements with sensible flexibility to reduce potential disruption to our day-to-day operations, while ensuring we met all auditor milestones. The auditors were professional and engaged in the process, making honest connections with our employees, creating a comfortable setting for the employee interviews.”

Kirsten Bews
Director, HR and Compliance, Houweling’s Group
Regarding its Equitable Food Initiative (EFI) certification

“We’ve always had great communication from the staff at SCS. Our auditor is a wealth of information for companies. We are very lucky to have this experience and professionalism in our industry.”

Ilwaco Landing Fishermen
Regarding its Marine Stewardship Council (MSC) Chain of Custody certification

“Social responsibility is gaining increased awareness in our industry. There are a lot of people making fantastic claims. Stakeholders can become confused and don’t know who or what to believe. SCS helps separate the wheat from the chaff. Their integrity and competence brings needed credibility to the certification process.”

John Farrington
COO, Andrew & Williamson

“The SCS Global Services team ensured that Numatic had a smooth certification process, thorough audits, and effective marketing support for announcing our Recycled Content Certification. We are proud to have our sustainability achievements backed by third-party certification.”

Sophie Knapman
Numatic, Recycled Content Certified

“Forest Carbon Partners has been pleased to work with SCS on over 20 carbon offset verifications. We value the expertise and professionalism of the SCS verification team because we know that undergoing third-party verification with SCS helps ensure the long-term integrity of our offset credits.”

Emily Warms
Manager of Investment & Operations, New Forests

“We wish to see the SCS Sustainably Grown Standard become the standard for the whole olive oil industry. It has brought our farmers and our farms so much goodness. Sustainably Grown offers a level of satisfaction and sustainability that is unmatched — it’s the best for the groves, the olives, for the people. Especially for the farmers and their families.”

Teresa Garcia López
Director of Sustainability and Environment, Pompeian

OUR CLIENT CARE PLEDGE

Quality of Service

You can count on us to bring the collective talents of our entire team at SCS to serve your needs. We will do our best to provide you with consistent, accurate information, and will continuously work to increase our expertise. When we don't have the answer, we will find someone who does and keep you updated on our progress. We will happily refer you to other resources if we're unable to meet your needs.

Identify and Anticipate Needs

We will always do our best to “walk in your shoes” to understand and anticipate your needs. We will listen first, and ask questions, to clearly understand your situation.

Reliability

We will do what we say we'll do. We will do our best to make sure our service reasonably meets your expectations. If things don't go as planned, we'll be honest and quick to keep you informed. If you ever become upset or unhappy with our service, we'll work with you to do all we can to resolve the problem to your satisfaction.

Accessibility & Responsiveness

We will be there when you need us and will be responsive to your needs. In general, we'll respond to phone calls and emails within one business day. If we don't think we can respond within two business days, or if we're away for an extended period, we'll make sure you have contact information for one of our colleagues.

Respect

We will act professionally and treat you with courtesy and respect. We will provide prompt and friendly service. We will be patient, understanding, calm and courteous when you express a question or concern about our service or the standards with which we work. We will respect your time and provide information in a concise and straightforward manner.

Trust

We will work hard every day to earn your trust and confidence. We will work with our colleagues to maintain a positive reputation – both with our clients and stakeholders – for the credibility and integrity of our service. We will do our part to ensure SCS provides fair and objective audits that stand up to scrutiny.

PARTNERSHIPS AND AFFILIATIONS

AFFI

The American Frozen Food Institute (AFFI) represents America's frozen food and beverage makers. AFFI is a member-driven national trade association that advances the interests of all segments of the frozen food and beverage industry.

Association of Professional Social Compliance Auditors (APSCA)

APSCA is an industry association, whose members represent a substantial majority of the Social Compliance audit industry. Its mission is to enhance the professionalism, consistency, and credibility of the individuals and organizations performing independent social compliance audits.

AgSafe

The mission of AgSafe is to advance the food and farming industries commitment to a safe, sustainable workforce and food supply by providing practical education and resources.

Building Transparency

Building Transparency's core mission is to provide the open access data and tools necessary to enable broad and swift action across the building industry in addressing embodied carbon's role in climate change. Our premier service is the Embodied Carbon in Construction Calculator (EC3), a free database of construction EPDs and matching building impact calculator for use in design and material procurement.

Business and Institutional Furniture Manufacturers Association (BIFMA)

BIFMA is the non-profit trade association for business and institutional furniture manufacturers. SCS is an active and long-standing member of BIFMA technical working groups for the e.3 Furniture Sustainability Standard and M7.1/X7.1 VOC Emissions Standards.

Forest Stewards Guild

The Forest Stewards Guild is a non-profit, professional organization of forest stewards, associated natural resource professionals, and affiliates who are passionate about restoring and sustaining the integrity of our forests while meeting the needs of the communities that rely on them.

Forest Stewardship Council® (FSC®)

Forest Stewardship Council is a global, not-for-profit organization dedicated to the promotion of responsible forest management worldwide.

Grower Shipper Association of Central California (GSA)

GSA is a respected and continuously growing force in the agricultural industry committed to representing the needs of its members. SCS is an associate member of The Chairman's Roundtable which allows GSA members to team up with industry leaders to make a stronger impact in shaping the important local, regional, state and federal issues facing agriculture.

Independent Bakers Association

The Independent Bakers Association is a Washington, DC-based national trade association of over 200 family-owned wholesale bakeries and allied industry trades. IBA supports market-oriented agricultural commodity programs and advocates for reducing the burden on manufacturers caused by excessive regulation.

Institute of Food Technologists (IFT)

Since 1939, IFT has been advancing the science of food and its application across the global food system by creating a dynamic forum where individuals from more than 90 countries can collaborate, learn, and grow, transforming scientific knowledge into innovative solutions for the benefit of people around the world.

International Fresh Produce Association

The International Fresh Produce Association is the largest and most diverse international association serving the entire fresh produce and floral supply chain.

International Precious Metals Institute (IPMI)

IPMI is an international association of members of the precious metals community formed to provide a forum for the exchange of information and technology.

Initiative for Responsible Mining Assurance (IRMA)

IRMA was formed to respond to the demand for socially and environmentally responsible mining. IRMA developed a comprehensive standard for all mined materials in a multi-stakeholder collaboration with mining companies, purchasers, NGOs, affected communities and labor organizations.

ISEAL Alliance

The ISEAL Alliance is an internationally recognized organization dedicated to ensuring credible and innovative sustainability standards.

mindful MATERIALS

mindful MATERIALS is a design industry initiative that provides a common platform for companies to clearly communicate transparency and optimization information for building products.

Program Operators Consortium (POC)

POC is a group of standards developers and certifiers specializing in the development of Product Category Rules and the certification of Environmental Product Declarations, working together to advance environmental product transparency in the marketplace.

ResponsibleSteel

A not-for-profit organization, ResponsibleSteel is the steel industry's first global multi-stakeholder standard and certification initiative. Its mission is to maximize steel's contribution to a sustainable society.

Specialty Food Association

The Specialty Food Association, Inc. is a not-for-profit membership-based trade association in the United States representing 3,000+ businesses. The SFA was established in 1952 to foster trade, commerce and interest in the specialty food industry in the U.S.

Sustainable Packaging Coalition (SPC)

The Sustainable Packaging Coalition brings together businesses, educational institutions, and government agencies to collectively strengthen and advance the business case for more sustainable packaging.

Texas International Produce Association (TIPA)

TIPA was created in 1942 to represent the business, economic, and political interests of Texas-grown fruits and vegetables; and address the issues and opportunities surrounding the imports of Mexico-grown produce that is shipped through Texas ports.

Textile Exchange

Textile Exchange is a global nonprofit organization that works with the entire textile supply chain to reduce environmental impacts and promote positive change within the industry. SCS collaborates with the Textile Exchange on climate change metrics and environmental claims verification programs and processes.

The Last Prisoner Project

The Last Prisoner Project focuses on justice initiatives for individuals still incarcerated for victimless cannabis offenses. SCS is supporting the Prison to Prosperity Reentry Program with food safety vocational training scholarships.

The Water Council – Water Champion

Membership as a Water Champion is for companies to show support for The Water Council's mission to solve global water challenges and drive economic growth through water innovation and stewardship. SCS is a founding Water Champion member.

ToxServices

ToxServices is a scientific consulting firm focused on toxicology and risk assessment. It helps manufacturers prepare and publish their HPDs using the HPD Collaborative's online builder tool, while SCS provides the independent verification required to validate the HPD disclosure claim.

United Fresh

United Fresh Produce Association is the industry's leading trade association committed to driving the growth and success of produce companies and their partners. United Fresh represents the interests of member companies throughout the global fresh produce supply chain, including family-owned, private, and publicly traded businesses as well as regional, national, and international companies.

U.S. Green Building Council

The U.S. Green Building Council is a nonprofit organization that promotes sustainable design and construction through the LEED® building rating system, along with educational offerings, nationwide chapters, and the annual Greenbuild Conference and Expo.

World Coffee Research

World Coffee Research unites the global coffee industry to drive science-based agricultural solutions to urgently secure a diverse and sustainable supply of quality coffee today and for generations to come.

GLOBAL OFFICES

SCS U.S. HEADQUARTERS

SCS provides services around the world, working in the natural resources, food and agriculture, energy, built environment, consumer products, and climate sectors. Partnering with companies, government agencies, NGOs, and stakeholders, we are striving to advance sustainable development goals through independent assessment, the application of sound science, and innovative solutions. Through these services, we are enabling decision-makers and purchasers to make informed decisions, giving innovators a competitive edge, and helping to drive the development of leadership standards to create a framework for continuous improvement.

Subsidiaries

SCS has established additional entities to serve the sustainability certification and business needs of companies throughout the world. The following is a listing of our regional offices.

SCS BRAZIL

SCS offers a comprehensive portfolio of internationally recognized certification, verification, and auditing services throughout Brazil and South America. Our expertise spans a broad range of sustainability sectors, including:

- Sustainable Agriculture — Bonsucro, Global G.A.P., RSPO, ProTerra, Fair Trade USA, Sustainably Grown, and others
- Sustainable Biofuels & Bioproducts — LCFS, ISCC, 2BS, RSB, Canada CFR
- Sustainable Forestry — FSC, PEFC
- Sustainable Seafood — ASC, MSC
- Sustainable Supply Chains – Ensuring full traceability and integrity across diverse commodities

In addition to these core services, we offer tailored solutions aligned with your sustainability goals.

Eddie Gomez, *Latin America Business Development Associate*

SCS EUROPE

With its main office located in Amsterdam (Netherlands) and from key European locations, SCS Europe provides global leadership in third-party auditing and certification, verification and advisory services a wide cross-section of industries, recognizing achievements in green building, product manufacturing, food and agriculture, forestry, retail, and more. Up to date with current European policy and regulatory developments, SCS Europe is your best partner for understanding the challenges and opportunities in the European market. We are accredited to provide services under a wide range of nationally and internationally recognized certification programs, including:

- Food Labeling Claims — Organic, Non-GMO, Fair Trade USA
- Regulatory Compliance — CBAM, CSDDD, CSRD, EUDR, ESPR
- Sustainable Agriculture — Bonsucro, RSPO, ProTerra, Rainforest Alliance
- Sustainable Biofuels/Bioproducts — ISCC, RSB, 2BS, INS, LCFS
- Sustainable Forestry — FSC, PEFC
- Sustainable Seafood — ASC, MSC
- Water Stewardship
- Sustainable Supply Chains — Recycled content certification, Textile Exchange Certification, FloorScore, Indoor Air Quality
- Carbon Neutral Certification, LCA, EPD, PEF
- Integrated Management Systems (IMS) — ISO14001, ISO9001, ISO45001

Additional certification schemes, verifications, audits and advisory services are available upon request.
