

RESPONSIBLE SOURCING

Advisory and Verification Services for a Sustainable Supply Chain

What is it?

SCS Global Services provides customized supply chain solutions that help companies strengthen their sustainability goals, build their reputation, lower the risks in their supply chain, and meet consumer and stakeholder demands for more sustainable food.

What we do

Our advisory services range from initial design of a sustainable sourcing strategy to developing specific criteria for supplier audits. We take your goals and criteria and translate them into a field or factory-level verification program, from pilot phase to program launch. Our industry expertise includes agriculture, mining and minerals, health and wellness products, apparel, and more.
